

## **Your Dirty Little Secret Under the Blanket... Blanket Rubs be Gone!!!**

With the departure of the unseasonably bitter cold weather that everyone has been subjected to over the last several months, all of us horse people are venturing out to the barn with more on our minds than just knocking the ice out of the water buckets and putting more blankets on our shivering horse buddy... The blankets are coming off, in preparation of a nice ride... only to discover the big, ugly chafes and blanket rubs on our guys' shoulders, hips and withers. Ugh! Now what? Spring is almost here (cross your fingers) and these rubs need to be gone NOW!

The solution.... Bickmore's Gall Salve...an ingenious and unique product that has been around since 1882. It WILL NOT rub off once applied and will allow you to continue to do what needs to be done while your horse is healing.

For example- Apply the Gall Salve on each of the chafes or rubs. Rub it in well and put the blanket back on your horse (yes, the very same one that caused these marks in the first place). Apply daily... before you know it, new hair growth will appear and all you will have to contend with is the excessive shedding. Yahoo!

I don't know about you but every Spring I seem to get a few rub marks from my tack. The girth area is the first place it shows up. I never know what it comes from. (Ask anyone out at the barn, it is not from my dirty tack- I am clean tack queen). I just know, with spring comes a few rubs and sores... Again, that is where Bickmore's Gall Salve comes in!

For example- Clean the area where the rub is occurring, apply the Gall Salve (rub it in well) and continue to tighten the girth and work as usual... In a few short days, the sore will start to decrease and go away. Oh the miracle of Gall Salve!

Bug bites, kicks, scratches, any kind of skin irritation- use the Gall Salve and continue to go about your business as if nothing changed... You can continue to work the horse while they are healing... (Hence the top of the tin clearly stating- "Be Sure and Work the Horse") The alum base will not allow the active ingredients to rub or sweat off... providing 24/7 healing!

Long story short- Gall Salve works... It is your multi-purpose, topical antiseptic ointment, with a unique combination of emollients (to soften, soothe, and lubricate damaged skin), astringents (to protect and close skin surfaces), and antiseptics (to aid in healing bacterial and fungal infections).

As with all Bickmore products, if you have any questions regarding the Bickmore products, drop me a line [bcohen@interexpdl.com](mailto:bcohen@interexpdl.com) or call the too free number on every can, bottle or jar... I will be there to answer the phone and your questions.
